

FLEXIBLE SOLUTIONS WITHOUT BOUNDARIES

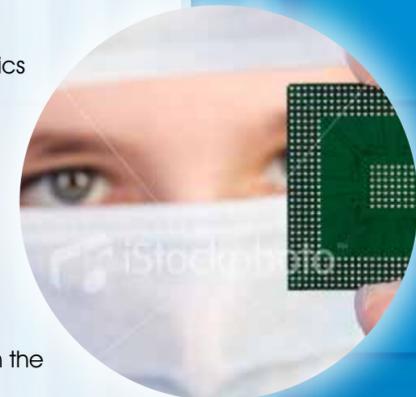

"Building quality products that ship on time, every time, at a competitive and fair price."

A RELIABLE PRODUCT. A SOUND PARTNERSHIP.

Look no further than International Control Services for an Electronic Manufacturing Services Partner you can trust.

When it comes to manufacturing electronics for specific technology-driven markets, International Control Services can provide integrated manufacturing services from rapid prototyping to volume production and direct order fulfillment with the highest level of customer service in the industry.

Our long-term customer relationships are built on capabilities and a promise. International Control Services promises to deliver EMS for low to medium volume electronics for a wide-range of innovative applications. We're an end-to-end solution for your business.

INTERNATIONAL CONTROL SERVICES

A nimble resource you can count on in every business climate.

Responsive solutions are necessary in today's marketplace. International Control Services can provide you with more than manufacturing. We are a partner who can help reduce your bottom line while advancing the quality of your products.

INTEGRATED PARTNERSHIPS

A full suite of solutions equals an integrated partnership model. We develop a strategic approach that's comprehensive and coordinates with your day-to-day needs while keeping your long-term goals in mind. An integrated services method is how we continue to successfully launch new prototypes and expand your product line while lowering cost.

NEW PRODUCT INTRODUCTION

We have a proven process that discovers an optimal path for launch while offering valuable analyses that continue to hone core competencies surrounding the new product's position in the marketplace.

Let us introduce AEGIS. We call it the "Discoverent" software system. It allows us to organize process development and manufacturing teams to collaborate more effectively to offer a better speed time to value of new products, and improve on process stability and predictability for existing products.

MANUFACTURING OPTIMIZATION

Our advanced manufacturing technology processes, failure analysis and test capabilities drive our clients' products to market faster, cheaper, and at their highest quality.

We're a nimble EMS company who has the flexibility to adapt and adjust to market trends while reducing manufacturing costs, so you can focus on your core business and maintaining a competitive edge.

Core Expertise:

- Design for Manufacturing
- Test for Manufacturing
- Value Stream Mapping
- Material Value Analysis
- Par Product Evaluation Plan

SYSTEM BOX BUILD SOLUTIONS

Assembly services are part of our fully-integrated function. When your manufacturing needs call for System Box Builds, look to ICS to provide a competitive manufacturing from product build to packaging and design.

Here's a sample of this end-to-end solution:

System Box Build > Integration > Testing > Custom System Integration > Special Packaging Design

Here's what our Box-Build services entail:

- Multi-card assemblies
- Card cages
- Complete-system integration
- Environmental Stress Screening (ESS)
- Full functional testing

PROTOTYPING

Innovative engineering services enable you to manufacture a prototype complete with advance failure analysis and reliability testing. Our highly trained teams ensure design specification prior to the start of production. Providing our clients with the lowest total cost in a timely fashion allow proper evaluation of each prototype to evaluate its readiness for mass production.

Regardless of product complexity or volume, three factors influence success:

Flexibility — Responsiveness to client specifications and the continual evolution of our prototyping technology prepares us to act and react according to product lifecycles and an ever-changing marketplace.

Speed — Our quick turn prototypes meet and beat time to market and time to volume requirements. ICS has some of the shortest overall lead times in the industry. Depending on size and scope of project, prototype turn around times can be as little as 48 hours.

Quality — Driving an efficient prototyping process means nothing without a quality, finished product coupled with sound operations. The end result is true insight into product development. The ICS test development team is a critical factor to a product's success. An established engineering department results in methodologies that keep troubleshooting time to a minimum and lowers production costs.

AFTER-MARKET SUPPORT

Servicing our clients doesn't stop once a product is manufactured. We continue to support our clients throughout a product's lifecycle. Many original equipment manufacturers (OEMs) are relying on an electronics manufacturing services (EMS) provider for the after-market support they need. We're a proven partner for the long-term. We ensure product performance, manufacturing expertise, and integrated services.

Our after-market services include comprehensive product management and end-to-end product lifecycle solutions.

Proficiencies include:

- Call center and technical support
- Reverse logistics
- Advanced exchange
- Repair and refurbishment
- Failure analysis
- Component refurbishment
- Product upgrades
- Warranty management
- End-of-life management
- Disposal Services

PCA – PRINTED CIRCUIT BOARD ASSEMBLIES

For two decades our core competency has included printed circuit board assemblies. ICS is a leader in high mix/low volume assembly specializing in complex assemblies and box builds. Not only do we offer a world-class operation, we also continue to help our partners get to market before the competition. We operate under a paperless factory model, which allows for real-time information to exchange hands. This specialization enables quick responses and gives our partners a competitive advantage. Bring your complex PCA assemblies to us, and we'll deliver beyond expectation.

VALUE-ADDED SERVICES

It's time to expect more from your partnerships.

Our partners benefit greatly from significant value added opportunities in several areas of the manufacturing process. The result is substantial savings. Our resources and capabilities give us an advantage that we can pass onto you. Value-added opportunities include component selection, commodity management planning, automated forecasting, and logistics for direct order fulfillment. ICS can also eliminate duplication, streamline business processes, and reduce costs, all to keep our clients competitive in the marketplace.

OUR BUSINESS IS TO SUPPORT YOUR GROWING BUSINESS.

We work with several manufacturing companies from industrial corporations to communication businesses to help them gain more traction in their respective fields.

INDUSTRIAL

ICS can help industries move their production from in-house to an outsourcing model that improves operations while gaining ground in the marketplace. We create an integrated customized manufacturing solution that offers our customers a position of strength, while being a reliant partner for life. ICS processes and technologies, vendor partnerships, and volume purchasing power equal a manufacturing model that enhances the bottom line.

NETWORK AND COMMUNICATIONS

Next-generation networks are advancing faster than ever. As your electronics solutions partner, we are committed to this evolution within the telecommunications industry. We have a proven history of providing services that range from the complex assembly of high-speed optical products to the system integration of VOIP equipment.

AEROSPACE AND DEFENSE

In an industry where security is paramount, we bring a competitive advantage to homeland security companies and top defense organizations by improving time to market with industry leading NPI processes. ICS is focused on meeting the technical challenges of high mix low volume, long life cycle reliable products. ICS has its ISO and ITAR certificates, which can give you the confidence to partner with us on many sensitive programs for defense aerospace and homeland security initiatives.

MEDICAL

Understanding of medical equipment and the intense reliability standards necessary to diagnose patients in this industry is critical. ICS is committed to upholding these benchmarks and has instituted operational practices that incorporate the latest technologies into the medical field.

Our objective is to partner with medical device and diagnostic companies. ICS business teams collaborate with you to create a customized solution to maintain the reputation necessary to thrive in the medical field.

PROJECT MANAGEMENT

Our supply chain management system is a proven process that begins with design and engineering expertise, continues with new product introduction, and is complete with commodity management. Throughout the entire process, you have a dedicated team at your disposal managing each step of a product's lifecycle. Each team member is there as your liaison ensuring your complete satisfaction.

QUALITY ASSURANCE

Quality assurance begins with an end-to-end provider.

A quality product starts with a customer-focused strategy.

We have developed a multi-faceted approach as an end-to-end provider to ensure our clients are an integral part of everything we do. This guarantees measurable results and an improved bottom-line.

Original Equipment Manufacturers (OEMs) know the urgencies in today's competitive landscape. The first to market a product typically reaps great financial rewards.

Partnering with ICS not only ensures timely market entry, you can also rest assured that we're delivering a quality product that has the integrity to stand the test of time.

As an end-to-end solutions provider, we have the quality, technology and service your business requires. We help you evaluate where and when to incorporate manufacturing services into your business, while improving upon your bottom line. No matter the volume or the complexity of an assembly, our proven processes will maximize efficiency and make the most of the marketplace.

ADVANCING TECHNOLOGY

Our commitment to advancing technology pays dividends in client satisfaction. We continue to refine our process and equipment to remain up-to-date on industry requirements and specifications. Our capital investments are just one of the benefits you receive when partnering with ICS.

CONTROL PLANS

We design for excellence and manufacture for success. Control plans are instituted to act as a checks and balances system for quality assurance from project conception to delivery. You can count on a project plan that will outline and review data every step of the way.

LET'S GET TO WORK.

When you're ready to put us to work for you, give us a call. We're a partner with a proven track record in the electronic manufacturing services industry. Let us improve your bottom line today.
